Séminaire Technologies CRISPR-CAS9

Institut de Biologie de Lille
Amphithéâtre
Jeudi 21 janvier 2016

14h – 15h : Fundamental and innovations in CRISPR-Cas9 gene editing

- Overview of the CRISPR-Cas9 biology
- Workflows for lentiviral (sgRNA) and synthetic (crRNA:tracrRNA) approaches
- Rational design of highly functional and specific sgRNAs and synthetic crRNAs
- Key factors in selecting the optimal CRISPR-Cas9 reagents

Discussion sur les avantages respectifs des outils ARN interférence et CRISPR

15h-16h : Atelier -
